Mamiya DM Series DSLR Camera Kits

Legendary Mamiya quality comes to large sensor DSLR's with 22, 28, 33, 40 and 56 megapixel models. Mamiya has partnered with fellow pro photographic industry leaders Schneider®, Phase One® and Leaf® to produce the DM series of professional digital cameras.

Designed to deliver the highest attainable image quality in practically any photography situation. Featuring 22, 28, 33, 40 and 56 megapixel sensors precision-matched with the world's greatest optics result in exquisitely detailed image files, even when severely cropped. The large sensors (up to 56mm) have a lush 16-bit/channel color palette, that provide exceptional color accuracy, and detail rich high dynamic range photographs (up to 12 stops) in a single capture. Other digital camera systems simply cannot compare.

The heart of the systems is the new "DF" camera. It features faster focusing and improved metering systems, as well as two user selectable shutter systems – leaf or focal plane. Choose from one of the 15 lenses for use with the cameras' focal plane shutter system, or the three Mamiya-Schneider leaf-shuttered lenses (55mm, 80mm, 110mm).

Images can be processed using either of the included software solutions – Capture One™ by Phase One, or Leaf Capture™ – or you can choose to use Adobe® Photoshop® Lightroom® (not included) allowing the widest variety of professional processing software options available.

Kits include Mamiya 645DF camera body, digital back, rechargeable Li-ion battery for digital back, battery charger, FW800 cable and camera strap.

NOTE: These new kits does not include a lens, so that you may choose the lenses appropriate for your needs.

322-222	NEW! Mamiya DM22 Camera Kit	\$9,990
322-228	NEW! Mamiya DM28 Camera Kit	\$11,990

322-240	NEW! Mamiya DM40 Camera Kit	\$17,495
322-256	NEW! Mamiya DM56 Camera Kit	\$28,495

Mamiya RZ Series Camera Kits

The Mamiya RZ Professional system has long been one of the favorite camera systems in the world. It is no wonder, when you look at its combination of smart, photographer friendly features, and its world-renowned optics. From it's legendary "Ideal Format", almost perfect for making 8-1/2 x 11 proportional images with virtually no image cropping or format waste, to its unique revolving back, which provides vertical or horizontal composing, the Mamiya RZ Professional system has earned the respect of professional photographers around the world.

Now with the demand from photographers to provide clients with clearly superior digital image quality, Mamiya introduces the new RZ33 and RZ22 digital camera kits. The RZ33 and RZ22 are the results of an evolution into the next generation of digital large sensor cameras. They offer advanced microprocessor technology for direct communication of all camera functions to its 33 or 22 megapixel digital back through its MSC (Mamiya Serial Communication) system. The result is cable-free digital operation just as smooth and trouble-free as shooting with film.

Kits include Mamiya RZIID camera body with digital focusing screen, digital back, Mamiya cable-free Digital Integration Plate, rechargeable Li-ion battery for digital back, battery charger, FW800 cable, Capture One™ by Phase One, and Leaf Capture™ software.

322-135	NEW! Mamiya RZ33 Camera Kit	\$17,990

Remote Viewing App for Apple iPhone/iPod Touch

The new LC Remote app for the Mamiya DM, RZ33, and RZ22 systems allows photographers additional creative freedom by enabling one or more Apple® iPhone® and iPod® Touch devices to act as remote image viewers. View, zoom, and pan hi-res RAW images from any of the Mamiya DM models, while you shoot tethered to a Mac using the Leaf® Capture workflow application.

Clients can view images for your shoot from the comfort of your Wi-Fi enabled client room. Assistants can check focus even when at a distance from your main computer. Stylists can see what the camera sees – all without crowding around the photographer or main computer area. Imagine the possibilities!

Mamiya RZ67 Adapter Kits

Make your Mamiya RZ into a new digital camera

Your Mamiya RZ67 camera system can be made into a versatile high resolution digital camera. It's easy! Simply add the appropriate adapter to one of the Mamiya DM Digital Backs. You will enjoy the ease of your RZ's integrated bellows focusing, sharp leaf shutter lenses, and rotating back features - but now with the added benefit of being digital.
